## Implement and Maintain Management Systems to Control Risk

**Introduction** This PDP has been designed to provide participants with the knowledge and tools to plan, prepare and implement a risk management system at their quarry, and then develop processes to support the risk management system on a continuing basis.

**Duration** 1 Day

**Potential Participants** Area and Regional Managers, Quarry Managers, Senior Quarry Supervisors, Any person involved in a quarrying operation who fulfils a statutory management role.

**CPD Points** 7

**Topics Covered** Meet the knowledge component requirements of RIIRIS501D Unit of Competency:

- Plan and prepare to develop the framework for the risk management system.
- Develop the processes to support the risk management system.
- Plan and implement the risk management system.
- Monitor, review and update the risk management processes.

Provides an advanced knowledge component for legal compliance requirements and safety and health legal requirements in quarries.

Provide the knowledge and tools for Quarry Management personnel to:

- Plan for the development, implementation, monitoring and review of a risk management system.
- Develop, implement, monitor and review a risk management system appropriate to their respective operations.
- Fulfil a pre-requisite for RIIGOV501D identify, implement and maintain legal compliance requirements.
- Prepare for on-site assessment of competency as part of the Quarry Management Certification System (QMCS).
