

Communication and Consultation

Introduction Engaging with your workers is critical in establishing and implementing an effective safety management system. Effectively communicating and genuinely consulting with all stakeholders at your workplace is an essential element in this engagement.

Duration 1 hour

Potential Participants Managers, supervisors and key support personnel are the primary target group for these webinars. There is a good opportunity to ask questions in an informal environment. Numbers are kept small to provide an opportunity for everyone.

Course Objectives Mining legislation, Work Health and Safety legislation, and “duty of care” requirements in each State require quarry operators to communicate and consult with their workers to ensure worker involvement and participation in developing and implementing effective safety management systems and procedures. This webinar provides information on::

- Effective communication
- Effective consultation
- Do’s and Don’ts when communicating and consulting
- Effective documentation and records generally

Participants will also be given practical examples of how small scale quarries have achieved significant safety improvement through effective communication and consultation.
