

# Manufactured Sand

**Introduction** Overview of Manufactured Sand produced by Quarry operations.

Manufactured Sand is increasingly used in the construction materials industry as the availability of natural sand deposits declines.

This webinar outlines the uses and typical properties of manufactured sand, and briefly covers off on operational issues during production and use of the product.

**Duration** 1 hour

**Potential Participants** Suitable for Quarry Managers, Quarry Supervisors, Testers, and Operational Management employed or seeking employment in the industry.

**Topics Covered**

1. What is manufactured sand?
2. What are the typical properties of manufactured sand?
3. Use of manufactured sand.
4. Operational issues to consider when using manufactured sand.

**Facilitator** Richard Ernst
