

## Specifications

**Introduction** How to read and interpret specification documents used in the construction materials industry.

Specifications provide the basis for conformance of most construction materials. This webinar takes the participant through the various documents that affect and influence quarry products.

**Duration** 1 hour

**Potential Participants** Suitable for Sales Managers, Quarry Managers, Technical / Laboratory Managers, Quarry Supervisors, Testers, and Operational Management employed or seeking employment in the industry.

**Topics Covered**

1. What is a Specification?
2. What are Australian Standard specifications?
3. What are State Road Authority specifications?
4. What is the difference between QA and QC?
5. Which specifications apply to quarries?
6. How to read and interpret specification documents.

**Facilitator** Richard Ernst
