

The Membership Review Committee (MRC) manages the allocation of individuals to the correct membership grade within the Institute of Quarrying Australia. Once you submit your application for IQA membership, your experience will be assessed against the requirements of each grade, and you will be allocated into the correct grade based on your role, experience and education within the quarry industry.

PERSONAL DETAILS

Details provided will be used to ensure the IQA has the most up to date information for your member record. All fields are mandatory.

SURNAME		GIVEN NAMES	
DOB		MOBILE	
EMAIL			
WORK PHONE		CURRENT EMPLOYER

MEMBER GRADES

FELLOW (FIQ)

Fellows are the leaders and senior managers of our industry, recognised for their contribution, expertise and achievements. IQA Fellows are an exclusive group of seasoned professionals with significant industry acumen and experience. IQA Fellows uphold industry standards and demonstrate leadership by supporting the IQA and industry networks and espousing professional development and lifelong learning. A Fellow can be recognised from within a quarrying business or as a supplier to the extractive industry.

MEMBER (MIQ)

Members are those working in management, senior supervisory or specialist roles in the industry. They will have a high level of practical experience, including in a position of responsible charge. Ideally a member will hold a minimum of a Diploma (or the equivalent industry experience). A Member can be recognised from within a quarrying business or a supplier to the extractive industry. The IQA automatically recognises any Quarry Manager with the statutory right to practice in their state as a Member.

TECHNICAL MEMBER (TMIQ)

Technical members work in a technical role that relates to the direct operation, or supporting operations, of the extractive industry. A Technical Member can be a direct employee in a quarry, a supplier or contractor. Ideally, a Technical Member will hold a minimum qualification of a Certificate IV in a relevant field, or the equivalent industry experience.

ASSOCIATE MEMBER (AIQ)

Associate Members generally work in support services roles such as sales, business development, human resources, finance or marketing. Associate Members may also include individuals who are new to the industry and just starting their careers in technical roles (less than 1 years' experience). Associate Members can be employed by suppliers or contractors to the extractive industry or with industry operators.

STUDENT MEMBER (SIQ)

Student Members are those members who are engaged in studying certificate, diploma or degree directly related to the extractive industry and are generally not yet working in the industry. Any trainee or apprentice who is working full or part time while completing their study will be recognised as Student Member. A person who is working part-time in the industry, while studying, may be considered a Student Member if over 75% of their time is spent as a student (meaning study is their predominant activity). A person who is employed in the industry and undertaking study while working will not qualify as a student member.

OPERATOR (OMIQ)

Operators are those people directly operating mobile plant, equipment and machinery. They drive haul trucks, front end loaders, excavators and other quarry mobile plant. To classify as an operator the majority of your role must be in driving equipment. For the purposes of IQA membership, Operator does not refer to an owner of a quarry, a person leasing a quarry or the person(s) responsible for the day-to-day operations at a quarry.
